

Sep 29, 2020

Effectively immediately, flood threshold category colors on the NWRFC website have been updated to align with the legend colors used by the NWS Advanced Hydrologic Prediction Service (AHPS). NWRFC river forecasts are available through both sites (NWRFC and AHPS). This change creates a consistent customer experience and helps reduce potential mixed messaging across NWS offices.

Please note that with this update the new Minor Flood threshold color is ORANGE (was RED). Also note, that the 90% Action/Bankfull category has been dropped.
